

DOUBLE EAGLE Plus 4 SPECIFICATIONS

Putting Turf & Putting Cup

Putting is a major part of any golf game and is realistically simulated with the specially designed putting turf provided by Par T Golf to simulate a real putting green. The texture reacts like a green for realistic putting in both speed and distance. The standard dimensions of the putting area are 14 feet wide x 20 feet long (427cm x 610cm) but can be modified to meet your requirements. Par T Golf also provides an electronically fitted 4-inch (10.2 cm) diameter putting cup that communicates with the golf game to provide "in the hole" sensing.

Enclosure & Putting Area

Par T Golf's linear frame is 14 feet wide x 12 feet long x 9 feet 8 inches high (427cm X 366cm X 297cm), and is made in modular pieces for easy assembly. This linear frame is a freestanding structure that holds the protective enclosure in place. It's tailored design is made for you and your guests' safety from errant golf balls, and it rests on the putting surface.

Console

The Double Eagle Elite Plus 4 console provided by Par T Golf is simple yet remarkably powerful. The system employs all the latest in computer hardware and includes an amazingly simple touch screen that allows any golfer the control of the multitudes of golf courses that can be played on "The Incredible Golf Machine".

An indoor golf simulator, a powerful personal computer, or a beautiful home entertainment system, the Double Eagle Elite Plus 4 console does it all.
